

HCL Technologies is a leading global IT services and consulting company headquartered in India, widely recognized for its innovation-driven approach, engineering excellence, and customer-focused solutions. Founded in 1976 as part of the HCL Group, the company has grown into a global technology powerhouse with a workforce of **over 500,000 employees** spread across multiple countries. This vast talent base enables HCL to deliver large-scale, complex digital solutions to enterprises worldwide.

HCL Technologies operates across **multiple streams of work**, catering to diverse business and technology needs. Its key service areas include **cloud computing, API development, application development and maintenance, data engineering, artificial intelligence, cybersecurity, DevOps, infrastructure management, and enterprise digital transformation**. In the cloud domain, HCL helps organizations migrate, modernize, and optimize workloads across major cloud platforms such as AWS, Microsoft Azure, and Google Cloud. Through API development and integration services, HCL enables seamless communication between applications, supporting microservices architectures and scalable digital ecosystems.

A major strength of HCL lies in its deep engineering and R&D capabilities. The company supports clients in modernizing legacy systems, building cloud-native applications, and accelerating innovation through automation and AI-driven solutions. HCL follows its unique “Employees First, Customers Second” philosophy, which empowers employees, promotes transparency, and drives accountability.

With a strong global presence across North America, Europe, Asia-Pacific, and the Middle East, HCL serves industries such as banking, healthcare, manufacturing, retail, telecom, and energy.
